

Membership Application 2017 - 2018

Harrow Angling Society

Founded in 1937 our friendly club welcomes all levels of angler, young and old. Harrow Angling Society provides freshwater angling in our private fisheries in Harefield Middlesex in the Colne Valley and in Bucks. The lakes and gravel pits contain specimen Carp, Tench, Pike, Bream, Roach, Rudd and Perch.

Society Waters

We offer 3 very different lakes within the Colne Valley providing coarse fishing sport to all levels. We also share three quarters of a mile of the river Colne with a weir roughly halfway down the stretch offering good fishing for Chub, Barbel, Perch, etc that can be caught on standard river tactics.

Harefield Pit1 - A gravel pit of around 7 acres situated south of Harefield village. The lake has an irregular shape and three islands. The depth varies along its length of the lake and is deeper at the northern end. The lake has a good head of most coarse species but is noted for good Tench fishing with fish to 10 lb along with a good head of Roach and Rudd. There are shoals of Bream of 10 lb along with Pike to 26lbs and a large head of Carp to 35 lb.

Harefield Pit2 - 55 acre water boasting specimen sized fish of all species. With Carp to over 40lb, Bream to over 15lb, Tench to over 12lb, Pike to over 29lb, Roach to over 2lb, Perch to over 4lb and Eels to 8 lb. There is something to whet the appetite of seasoned specimen anglers looking for a challenge.

Rowley - 4.5 acre mature estate lake. Wildlife haven and balanced mixed fishery with specimen Carp to over 30lb, Tench to over 7lb, Perch to over 2lb and Pike to over 20lb. A good head of silver fish for a great days sport and a beautiful environment with fish a bonus.
